

HOW DOES THIS “AREA PLAN” RELATE TO THE PROPOSED ATLANTIC COAST PIPELINE ?

Clarification:

The Rockfish Valley Area Plan (RVAP) is entirely separate from the proposed Atlantic Coast Pipeline project. Nelson County’s efforts to undertake this Area Plan project were initiated months in advance of any announcement of the Southeast Reliability Project or the Atlantic Coast Pipeline (ACP).

While the proposed ACP project would traverse the majority of the RVAP study area, and while the ACP is a high-profile and highly relevant issue, the Area Plan has a more comprehensive focus on the overall study area and will provide analysis on a much wider variety of issues.

To summarize, this Rockfish Valley Area Plan is not a response to the proposed ACP project; and the Area Plan’s intent, purpose, and focus are much broader than any one particular issue.
