COVID-19 Organizational Chart

ESF-8 Public Health & Medical Updates

- Vaccination provider site closures, cancellations of well-child visits, and decreases in vaccine orders in the Vaccines for Children (VFC) program indicate that children may be falling behind on vaccinations, thereby increasing susceptibility to vaccine-preventable disease. VDH is tracking the volume of vaccines sent to the Virginia Immunization Information System (VIIS). Since March 15, vaccines reported to VIIS have decreased 45.7% since the same time last year (March 15 – April 23).
- Testing continues to increase in the Commonwealth. VDH has created [videos](#) for healthcare providers showing how to obtain a healthcare worker-observed nasal swab test for COVID-19 testing wearing appropriate PPE. Amazon provides a [portal for healthcare professionals](#) to purchase PPE in varied amounts and types at reasonable prices. The VDH website shows [COVID-19 testing sites by zip code](#).
